

SOFTWARE REQUIREMENT SPECIFICATION (SRS)

Project Name: Samvardhan Official Website

Version: 1.0

Date: January 03, 2026

Prepared For:

Samvardhan (NGO)

Client Representative: Amey Kokate

Prepared By:

- Ajinkya Moharir
- Tejas Retharekar
- Neel Naik
(Internship Team)

1. Introduction

1.1 Purpose

The purpose of this document is to define the functional and non-functional requirements for the development of the official website for **Samvardhan**. The website aims to establish a digital presence for the NGO, showcase their social impact, manage event archives, and facilitate donations via a secure verification process.

1.2 Scope

The software will be a dynamic web application consisting of two major modules:

1. **Public User Interface:** Accessible to all internet users to view information, gallery, timeline, and donate.
2. **Admin Portal:** A password-protected dashboard for the organization owner to manage content (Timeline events, Gallery photos) without coding knowledge.

2. Overall Description

2.1 User Characteristics

- **Visitor:** General public interested in social work, potential donors, and volunteers.
- **Administrator (Owner):** The authorized personnel from Samvardhan responsible for updating website content and verifying donations.

2.2 Product Perspective

The website will be a responsive web application that functions seamlessly on mobile devices, tablets, and desktops. It will utilize a centralized database to store event logs, gallery images, and donation records.

3. Functional Requirements: Public Interface

The public-facing website will consist of the following navigation tabs:

3.1 Home (Landing Page)

- **Hero Section:** Display a high-quality banner image with the organization's tagline.
- **Impact Counters:** Dynamic display of statistics (e.g., Total Events, Collaborations, Articles, People Impacted).
- **About Section:** A summary of Samvardhan's mission and vision.
- **Media & Press:** A section dedicated to newspaper clippings, articles, and media features regarding the NGO.

3.2 Our Work (Timeline)

- **Timeline Visualization:** A vertical chronological timeline displaying the organization's journey from inception to the present.
- **Event Cards:** Each timeline entry must display:
 - Event Title
 - Date
 - Brief Description
 - One Feature Photograph
- **Sorting:** Events shall be automatically sorted by date (Newest first).

3.3 Gallery

- **Photo Grid:** A responsive masonry or grid layout displaying photographs of various activities.
- **Lightbox View:** Clicking on a photo shall expand it to full screen for better viewing.
- **Updates:** Content in this section is dynamic and controlled by the Admin.

3.4 Donations

- **Donation Form:** A simplified form collecting:
 - Donor Name
 - Email Address

- Phone Number
- Donation Amount
- **Payment Gateway Interface:**
 - Upon clicking "Proceed," the system will display the **Samvardhan PhonePe QR Code**.
- **Verification Mechanism:**
 - The donor scans the code and completes the payment via their mobile app.
 - The donor must upload a **Screenshot** of the successful payment transaction.
 - On submission, the data and screenshot are stored in the database for admin verification.

3.5 Contact

- **Social Connectivity:** Direct links to Instagram, LinkedIn, and Gmail.
 - **Direct Contact:** Display of official phone number and address.
-

4. Functional Requirements: Admin Panel

4.1 Authentication

- **Login System:** Secure login page requiring a specific Email and Password.
- **Session Management:** The admin shall remain logged in securely until logout or session expiry.

4.2 Timeline Management (CMS)

- **Add Event:** Interface to input Event Title, Date, Description, and Upload a Cover Photo.
- **Edit Event:** Ability to modify details of past events.
- **Delete Event:** Ability to remove an event from the timeline.

4.3 Gallery Management

- **Photo Upload:** Ability to upload multiple images to the public Gallery page.
- **Photo Delete:** Ability to remove outdated or incorrect images.

4.4 Donation Management

- **View Submissions:** A dashboard table listing all donation attempts.
 - **Proof Verification:** Admin can view/download the payment screenshots uploaded by donors to reconcile with bank statements.
-

5. Non-Functional Requirements

5.1 Performance

- **Page Load Speed:** The website should load within 3 seconds on average 4G networks.
- **Image Optimization:** The system should automatically compress images uploaded by the Admin to ensure fast performance.

5.2 Security

- **Route Protection:** The Admin Panel URL must be protected against unauthorized access.
- **Data Validation:** The Donation form must validate inputs (e.g., valid email format) and restrict file upload types (only images allowed for screenshots).

5.3 Reliability

- **Uptime:** The application should aim for 99% availability.
- **Data Integrity:** Ensure that event data and photos are not lost during updates.

6. Technology Stack (Proposed)

- **Frontend:** React.js + Tailwind CSS
- **Backend:** Node.js + Express.js
- **Database:** MongoDB
- **Cloud Storage:** Cloudinary (for storing Gallery images and Donation screenshots)
- **Authentication:** JWT (JSON Web Tokens) or Firebase Auth
